

## About WingTip

Before we talk about the kind of products and services WingTip provides, a quick note is in order for those of you on a mission! The menu at the top of this page provides links to specific product information, while the information below is more general.

Since you are still here, you are probably wondering just who and what we do here at WingTip. WingTip is the first choice for process and discrete manufacturing performance improvement software. Serving the Western United States and Canada, WingTip is a delivery organization for the best of breed products in Manufacturing Performance Management, OEE (and other KPI improvers), Risk Management, Safety and Operations Cost Reduction.

At WingTip we have fine-tuned the science of looking for PRACTICAL innovation. We are constantly striving to locate and provide unique solutions for our customers. We aren't married to any technology, and are constantly on the outlook for technology that can improve our customer's performance in the process and discrete manufacturing arenas. WingTip is comprised of industry experts who've been in the industry, know the challenges and whose only goal is the customers benefit.

When WingTip applies innovation for your company, we help you infuse new ideas and ways of doing things into your organization; this improves your business, and often accomplishes the improvemnet without major disruptive change. WingTip takes a full circle business approach covering process, delivery, business and technology software and services that help you increase speed, quality, availability, visibility and risk / safety management while decreasing costs.

WingTip has customers throughout oil and gas, petrochemical and petroleum refining, food / beverage, pharmaceutical, pulp and paper, power generation and utilities, metals and mining, water/wastewater, manufacturing, and many other vertical industries.

We look forward to adding you to our list of customers, and forming a long-term partnership to help you succeed!
